

Corporate subscription right-sizing.

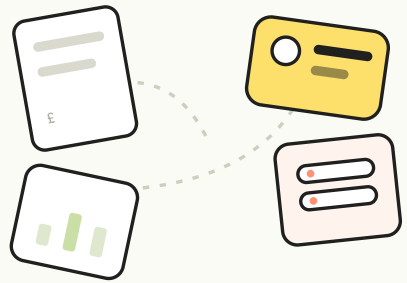

MCP tools that find and cut licence waste.

The YEEI4 team

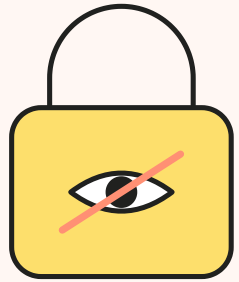

Corporates overpay for licences they don't use.

Paying for shelfware

Scattered data

Optimisation hold-up

A set of agentic tools.

`research_pricing`

Researches subscription tiers and vendor terms.

`get_usage`

Traces real active-user counts from SSO.

`analyse_subscriptions`

Suggests the optimal tier that still covers the real use.

COMING SOON

`renegotiate_subscription`

Automatically updates tiers to match the real-time use.

Under the hood.

Any MCP client

Claude, Copilot or your own agent calls the tools.

MCP server

Exposes the right-sizing tools over MCP.

Gemini engine

Researches and analyses even messy data, securely.

How we deliver.

Traceable reasoning

Every recommendation traces from live SSO activity-log data and real vendor pricing tiers.

Real data

Real data is sourced, cached and refreshed to collect repeatable benchmarks to increase negotiation power.

Risk mitigation

Call limits enforced, every action logged.

Impact & Quality

Immediate saving and information in real time.

Say bye-bye to waste.

- Works with your systems
- Saves up to 30%
- Keeps you informed
